## **Preface**

Operational Research is an important scientific discipline with many new theoretical developments and practical applications. The International Conference on Applied Operational Research (ICAOR) is an annual forum bringing together academics and practitioners from around the world to discuss the most recent developments in operational research and management science (OR/MS). The conference covers all aspects of our subject, but with a particular emphasis on applications. This year, the sixth event in our planned series of conferences – ICAOR 2014 takes place in the city of Vancouver, Canada.

We received quality submissions from approximately 21 countries around the world and finally could accept 28 papers for presentation at the conference and publication in these proceedings.

The papers that appear in this volume were carefully and thoroughly refereed. Our sincere thanks go to the members of the scientific programme committee who gave a significant amount of their valuable time to this task. We are also very grateful to all those who have helped in organising the conference. We are sure that their contributions will add significantly to the success of the conference.

We very much hope that you will enjoy the conference programme and the planned social events. We wish you all a very pleasant stay in Vancouver and trust that you will find the conference to be of value and leave us having made many new friends.

**Kaveh Sheibani**  
ICAOR General Chair

July 2014

## **6<sup>th</sup> International Conference on Applied Operational Research (ICAOR'14)**

### **ICAOR General Chair**

Kaveh Sheibani, OR Laboratory of Western Canada, Canada

### **Program Chairs**

Roberto Montemanni, Dalle Molle Institute for AI, Switzerland

Tomas Nordlander, SINTEF, Norway

Patrick Hirsch, University of Natural Resources & Life Sciences, Austria

Mario Vanhoucke, Ghent University, Belgium

### **Scientific Program Committee**

Javier Faulin, Public University of Navarra, Spain

Patrick Hirsch, University of Natural Resources & Life Sciences, Austria (Co-Chair)

Angel Juan, Open University of Catalonia, Spain

Nina Kajiji, University of Rhode Island, USA

Gilbert Laporte, HEC Montréal, Canada

Jesper Larsen, Technical University of Denmark, Denmark

Roberto Montemanni, Dalle Molle Institute for AI, Switzerland

Tomas Nordlander, SINTEF, Norway (Co-Chair)

Helena Ramalinho, Universitat Pompeu Fabra, Spain

Andrea Schaerf, University of Udine, Italy

Kaveh Sheibani, OR Lab Western Canada, Canada (Co-Chair)

Stella Sofianopoulou, University of Piraeus, Greece

Mario Vanhoucke, Ghent University, Belgium (Co-Chair)

Ursula Walther, Berlin School of Economics and Law, Germany

Scott Yeomans, York University, Canada

## Contents

Preface.....	III
The healthcare sector needs more operational research..... <i>Tomas Eric Nordlander</i>	1
Approximated dynamic programming algorithms with variable neighbourhood search for reformed dynamic quadratic assignment problems ..... <i>P Luangpaiboon, S Muenvanichakul and P Charnsethikul</i>	4
Identifying aircraft and personnel needs to meet on-station patrol requirements..... <i>F-A Bourque, R Mirshak, PL Massel, BU Nguyen and Major JCW Ansell</i>	15
Blood supply chain with insufficient supply: a case study of location and routing in Thailand..... <i>Pornpimol Chaiwuttisak, Honora Smith, Yue Wu and Chris Potts</i>	23
Determining optimal osmotic drying parameters for papaya using the firefly algorithm ..... <i>Julian Scott Yeomans and Xin-She Yang</i>	32
An analytical framework with a network-based optimization model for rescheduling a delay containership..... <i>Hua-An Lu</i>	40
A heuristic approach for an inventory routing problem with backorder decisions ..... <i>Stella Sofianopoulou</i>	49
A generalized additive neural network application in information security ..... <i>Tiny du Toit and Hennie Kruger</i>	58
Reverse logistics decision making for modular products: the impact of supply chain strategies..... <i>Thomas Nowak, Fuminori Toyasaki, Tina Wakolbinger and David Ng</i>	65
A diet expert system utilizing linear programming models in a rule-based inference engine ..... <i>Annette van der Merwe, Hennie Krüger and Tjaart Steyn</i>	74

Kalman-Filtering formulation details for Dynamic OD passenger matrix estimation .....	82
<i>Lidia Montero, Esteve Codina and Jaume Barceló</i>	
Determining fleet size for a Canadian maritime patrol aircraft .....	91
<i>Richard McCourt, Sean Bourdon and Matthew MacLeod</i>	
Heuristics for single machine scheduling under competition to minimize total weighted completion time and makespan objectives .....	99
<i>Yuvraj Gajpal, Alok Dua and Shesh Narayan Sahu</i>	
A simplified model for scheduling services on auxiliary bus lines .....	106
<i>E Codina and L Montero</i>	
Pricing, product quality, and retail service in a three-echelon supply chain .....	119
<i>Gerhard Aust</i>	
From MaxPlus algebra to general lower bounds for the total weighted completion time in flowshop scheduling problems .....	128
<i>Nhat-Vinh Vo and Christophe Lenté</i>	
A mathematical programming approach for solving the problem of fixing prices and augmenting capacity for two competing suppliers.....	138
<i>Gaytán Juan, García Marco and Arroyo Pilar</i>	
Solving the green capacitated vehicle routing problem using a tabu search algorithm.....	141
<i>Sergio Úbeda, Javier Faulin, Adrián Serrano and Francisco Arcelus</i>	
A transportation branch and bound algorithm for solving the generalized assignment problem .....	150
<i>Elias Munapo</i>	
Heuristic schemes for the efficient utilization of 3D printing stereolithography apparatus.....	159
<i>Vassilios Canellidis, John Giannatsis and Vassilis Dedoussis</i>	
Three metaheuristics for the construction of constant GC-content DNA codes .....	167
<i>R Montemanni, DH Smith and N Koul</i>	
Optimizing the supply chain configuration with supply disruptions .....	176
<i>Ruiqing Xia and Hiroaki Matsukawa</i>	
A closed-loop supply chain repackaging linear optimization problem .....	185
<i>José Díaz De La Hoz and Hiroaki Matsukawa</i>	

Heuristic solution methods for the Fiber To The Home cabling problem.....	198
<i>Matthieu Chardy and Dorra Dhouib</i>	
A fast heuristic for the prize-collecting Steiner tree problem.....	207
<i>Murodzhon Akhmedov, Ivo Kwee and Roberto Montemanni</i>	
GIS-based optimization for advanced biofuels supply chains: a case study in Tennessee .....	217
<i>T Edward Yu, Lixia He, Burton C English and James A Larson</i>	
Multi-node offer stack optimization over electricity networks .....	228
<i>Anthony Downward, Danny Tsai and Yibo Weng</i>	
Price, quality and advertising decisions considering reference quality effects: search versus experience goods .....	239
<i>Yanyan He, Qinglong Gou, Susan Li and Zhimin Huang</i>	
Author Index .....	247
