Preface

Operational Research is an important scientific discipline with many new theoretical developments and practical applications. The International Conference on Applied Operational Research (ICAOR) is an annual forum bringing together academics and practitioners from around the world to discuss the most recent developments in operational research and management science (OR/MS). The conference covers all aspects of our subject, but with a particular emphasis on applications. This year, the seventh event in our planned series of conferences – ICAOR 2015 takes place in the city of Vienna, Austria.

We received quality submissions from approximately 11 countries around the world and finally could accept 13 papers for presentation at the conference and publication in these proceedings.

The papers that appear in this volume were carefully and thoroughly refereed. Our sincere thanks go to the members of the scientific programme committee who gave a significant amount of their valuable time to this task. We are also very grateful to all those who have helped in organising the conference. We are sure that their contributions will add significantly to the success of the conference.

We very much hope that you will enjoy the conference programme and the planned social events. We wish you all a very pleasant stay in Vienna and trust that you will find the conference to be of value and leave us having made many new friends.

July 2015

Patrick Hirsch
ICAOR'15 Chairman

Kaveh Sheibani
ICAOR General Chair

7th International Conference on Applied Operational Research (ICAOR'15)

ICAOR General Chair

Kaveh Sheibani, ORLab Analytics, Canada

Program Chairs

Javier Faulin, Public University of Navarra, Spain

Patrick Hirsch, University of Natural Resources & Life Sciences, Austria

Roberto Montemanni, Dalle Molle Institute for AI, Switzerland

Tomas Eric Nordlander, SINTEF, Norway

Stella Sofianopoulou, University of Piraeus, Greece

Scientific Program Committee

Esteve Codina, Universitat Politècnica de Catalunya, Spain

Geert De Maere, University of Nottingham, UK

Javier Faulin, Public University of Navarra, Spain (Co-Chair)

Patrick Hirsch, University of Natural Resources & Life Sciences, Austria (Chairman)

Angel Juan, Open University of Catalonia, Spain

Gilbert Laporte, HEC Montréal, Canada

Pongchanun Luangpaiboon, Thammasat University, Thailand

Roberto Montemanni, Dalle Molle Institute for AI, Switzerland

Lidia Montero, Universitat Politècnica de Catalunya, Spain

Tomas Eric Nordlander, SINTEF, Norway

Helena Ramalhinho Dias Lourenço, Universitat Pompeu Fabra, Spain

Patrick Schittekat, SINTEF, Norway

Kaveh Sheibani, ORLab Analytics, Canada (Co-Chair)

Stella Sofianopoulou, University of Piraeus, Greece (Co-Chair)

Greet Vanden Berghe, Katholieke Universiteit Leuven, Belgium

Mario Vanhoucke, Ghent University, Belgium

Ursula Walther, Berlin School of Economics and Law, Germany

Scott Yeomans, York University, Canada

Contents

III	Preface
1	Matheuristic optimization for robust home health care services <i>Thi Viet Ly Nguyen, Nihat Engin Toklu and Roberto Montemanni</i>
8	A crowd simulation for a large-scale indoor venue - a case study of Taipei Arena <i>Yun-Zhu Lin, Ming-Gin Wu and Che-Fu Hsueh</i>
15	Using multi-start biased randomization of heuristics to solve the vehicle routing problem with clustered backhauls <i>Javier Belloso, Angel A. Juan, Javier Faulin and Adrián Serrano</i>
21	Optimizing non-combatant evacuation operation transportation logistics <i>Bohdan L. Kaluzny and Jean-Denis Caron</i>
27	Scheduling ground-handling services: a bi-objective approach <i>Daniel Guimarans, Silvia Padrón, Juan José Ramos, Salma Fitouri-Trabelsi and Liana Napalkova</i>
34	Pushback delays on the routing and scheduling problem of aircraft <i>Christofas Stergianos, Jason Atkin, Patrick Schittekat, Tomas Eric Nordlander, Chris Gerada and Herve Morvan</i>
41	Increasing trust in optimization based ATM systems through training <i>Tomas Eric Nordlander, Amela Karahasanović and Patrick Schittekat</i>
45	Performance optimization in retail business using real-time predictive analytics <i>Nizar Zaarour and Emanuel Melachrinoudis</i>
50	Fraudulent URL Classification with an RBFNN <i>Dirk Snyman, Tiny du Toit and Hennie Kruger</i>
56	Applying an immune ant colony system algorithm to solve an integrated flexible bay facility layout problem with input/output points design <i>Yun-Zhu Lin and Yu-Chin Lin</i>
63	Hybrid-demand queueing for commuter parking <i>Charles D. Pack</i>
70	ESG portfolio optimization: integrating combinatorial goal programming and corporate responsibility ratings <i>Gordon H. Dash and Nina Kajiji</i>
76	Pruning rules for optimal runway sequencing with airline preferences <i>Geert De Maere and Jason A.D. Atkin</i>
83	Author Index
